Fun 3d Shoot'em up with a good difficulty, fun upgrades and beautiful graphics!. I'm not afraid of spiders anymore, I own them all! 10/10. this game got me hooked. after a few tries i read the enemies and managed to aim correctly, so i could concentrate on what to do next. the unlockable weapons and perks invite you to try new strategies. do i machinegun them down, after doing doing aera-damage with bombs ? do i snipe them down while the poison attacks drain the remaining life? the movement is great, and feels well-adjusted. this is a sweet shooter and excellent air-to-surface combat !. It might have been fun, but its ridiculously graphics heavy and really doesn't like my card, so.... This game is awesome!

I hate spiders since I was a kid - time for revenge with Glow ;-)

Even the first levels are fun, but there is much more coming the longer you play.

Thumbs up!. It's better than Holy Cows, but it would have benefited from more time in Early Access!

- Gameplay is fun and original but gets boring pretty quick: I got to level 4 and still only fought spiders. Devs need to mix it up earlier to keep players interested.

- Keybindings are unchangeable (!) I never used the alt-fire because i was unable to reach the key.

Unfortunately, there is no "undecided" on steam. Buy only if you see the potential and trust developers to improve (like early access). If you expect a finished/polished game, and 5 bucks is a lot of money for you: stay away!. Great game! Really enjoyed the idea of being a bug :) It is a great game for playing if you don't have much time and just having fun... OK, sometimes it makes you addicted to kill the next spiders.... so far I see the potential its a little like buck bumble on N 64 , but keybindings need work its not really that playable with the current pre set configuration , I want to play this game properly ! its weird enough to capture my attention .. just needs better controller support. Oh you can play with mouse and keyboard and that works better , but its not the same. If you liked Buck Bumble as I did.. give this a try. Its a imaginative little game with decent graphics , just needs decent xbox controller key bindings where you can fire without taking a hand off the controller.

I'll conclude... I think the devs can easily fix these small issues I believe there is a place for these types of imaginative little games ...I like it.. Great game!!! Had so much fun playing the Killer bee!!! Enjoy!. GLOW constantly alternates between serene and unsettling, I like the minimalistic artstyle and the soundtrack is just awesome!

This is a solid game, especially for the price point. The game stays interesting through increasing difficulty, unlocking of abilities and has solid graphics.

The only thing I would say could be added are small things (And likely different per person). I would love for there to be some music when in the UI, more maps available and for the game to be brighter in general.

However, as I say, for the price of the game, it is very well done and offers a lot more than something like an app of which costs the same amount!

I've recorded a video of me playing the game if you would like a feel of how it plays. To view it, you can go here:
