About This Content

On January 29, 1943 began the offensive Operation "Leap" of the South-Western Front forces. In the first days of the operation, positions of 320 ID and 298 ID were smashed and both divisions began retreating in disorder to the west. 298 ID could not be saved and it vanished almost in full under attacks of the Red Army units. Not wishing to lose the second, 320 ID, the German command developed a plan for its rescue: units of the 2nd MIR LSAH will reach the Andreevka area, between Zmiev and Balakleya. 320 ID will also arrive there. To ensure the escape of 320 ID, aircraft constantly supplied fuel, ammunition and food to its location, and dive bombers were actively used by its request. By the end of February 11, units of Soviet 111 RD had passed Krasnaya Polyana in the direction of Vodyanoe, aiming along the Uda river to Borovoe village, from where they could strike the rear of the MIR LSAH battlegroup defending Vasishchevo-Lizogubovka-Ternovoe. Block breakthrough attempts of 320 ID units, playing as the Soviet side, or break through the Soviet encirclement and save 320 ID units, playing as the German side.

- Four operations of 12 turns for each of the parties (Krasnaya Polyana, February 12-15, 1943).
- Precisely recreated area of over 90 sq. km near the Uda river, village Vodyanoye and Krasnaya Polyana.
- Historical organizational structure of units at the time of the operation.

too much story 8/10 - IGN. 10/10 Would party again. Maybe one of the most creative shooters I've played. Has more replay value than most too. You run around as a cybernetic warrior that can hack his enemies into submission, create clones of himself using his mind, and deflect bullets with a sword. You fight demons, aliens, and human factions while discovering what the shady organization you work for is really doing... it has just the right amount of mystery to drive the plot. Would recommend to anyone who likes shooters.. In my opinion, this game is really fun and requires strategy to win. Although some people do not like the game, i respect their opinions and don't mind them.

Good game!. Simple level-based horror shooter with niche graphics and pretty decent atmosphere.. Its a good game but here's the thing I don't know the objective. All I did was walk around and shoot people.. A absolute blast!

A great 2D multiplayer brawler what keeps the game fresh with alternating modes (in game) and card pick ups which mixes the game up for a unique gaming experience.

Add friends for instant enjoyment!

Loved the game! The online play is a bit shaky, but it's still an amazing game!. A mildly entertaining distraction, but I'm pretty sure this will never be finished. I'll take down this review if it happens, but I'm not holding my breath.. I would never expect this could be an issue in my life, but I can't cut the head with an spinning blade. This game is strangely satisfying.. Sorry but i just recommend this game for \$29.

Cons: Every map is almost identical.

The goal is always the same, there's no variation

Very short finish time

Even though there a few towers there's really not that much strategy behind the game.... gather as much resources as quickly as you can then just keep requesting more workers for more towers...

Not worth \$30 for the amount of content. Such a cool idea for a game that translates perfectly to VR.

The game is extremely intuitive and anyone can pick it up and play. I watched many VR first timers hop right in and fill orders at a local Dreamhack convention.

Really excited to see how the game develops, and what new features get added.

Even in its current state(very polished), its easily worth the 9.99. Great RPG where you learn about how autistic kids see the world and think about it
